

GA-02

DigiTool™ Event Wallet

Rosslare's DigiTool™ GA-02 Event Wallets are part of a line of professional leading-edge high-quality, high-performance guard patrol system products for private and public sectors. The attractively designed compact wallet is easy to transport and easy to use.

When used with DigiTool's ID location tags or ibuttons, the GA-02 enables fast and trouble-free condition monitoring and event fault recording of events such as, an open window, broken glass, abandoned car, door locked, or fire extinguisher low pressure. It is the answer for users with multiple data collection needs.

DigiTool™
Digital Data acquisition

General Description

Rosslare's user-friendly GA-02 is an easy-to-fold event wallets with easy portability that the guard patrol staff can carry with them as they perform their daily tasks.

By simply touching the location tags, the innovative event wallets automatically records specifically coded events for later reporting through GS-02 DigiTool Call Center (DCC) software.

Each numeric digital ID button can be set in the system as a unique event. Rosslare offers two event wallet models. The GA-02 has 10 different IDs for different events. GA-12 enables up to 6 button combinations, allowing for a million combination possibilities.

With the GA-02, you can easily manage your distributed DigiTool guard patrol monitoring system on a large geographic and data quantity scale.
